About Estarta Solutions

Estarta Solutions was formed in 2002 through a JV of a US-focused outsourcing company, a local systems integrator and a strategic partnership with a Multinational Corporation, with the goal of tapping into the solutions development, integration and professional services economy. In its early years, Estarta became one of the key companies involved in the acceleration of regional public (eGovernment) and private (Financial Services & Telecoms) programs.

Estarta has witnessed significant expansion in the last several years in terms of its headcount, range of services and geographies of operation. The company has grown to over +1300 employees with a sustained focus on continuing to offer employment and training opportunities to talented team members and especially fresh graduates, combined with an increase in activity in our historical markets as well as the acceleration of our business in several Eastern and Western European markets.
